CRIMAR® /

透光大理石夹胶玻璃  
Thin translucent marble laminated

**定义**

Cricursa以温暖优雅的天然大理石薄片结合安全可靠的夹层玻璃,制作出透光又高雅独特的Crimar®。

**玻璃类型**

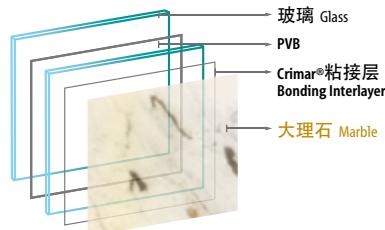

使用超白玻璃来增强石材天然色彩美态。

**Definition**

Cricursa's laminated glass product combines glass and a thin veneer of translucent marble. Crimar® is an elegant and exclusive product which combines the warmth and style of natural stone with the security of laminated glass.

**Glass type**

Extra-clear glass is used to enhance the beauty of the stone's natural color.

## 技术资料

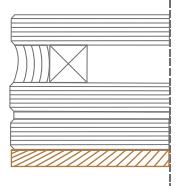

Crimar®使用的技术较市场上的同类产品更为先进。公司的专利夹胶工艺使用非有机夹胶层粘合大理石和玻璃，避免出现脱胶。该系列产品可抵抗紫外线，夹胶层不会褪色变黄。Crimar®产品全部采用退火玻璃制造，钢化或半钢化玻璃并不适用。可制成夹胶玻璃和双层玻璃。可选用各式大理石夹层。

## Technical data

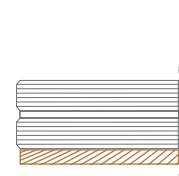

Technically, Crimar® is the foremost product of its kind available on the market. The patented lamination process uses non-organic interlayers to bond marble and glass, so as to avoid potential delaminating in the future. It is resistant to UVs which prevents discoloring and yellowing of the lamination. Crimar® is always manufactured with annealed glass. Tempered and heat-strengthened glasses cannot be used. It comes in two versions: laminated and double glazing. Different marble types can be used.
